

Toy positive control: wall-clock signal in the loss support installs chronoception

Qwen2.5-{1.5B, 7B}, 30 held-out T3.1 instances each. LoRA rank 16, three epochs, wall-clock-grounded SFT targets. Dashed green rule = Augustine threshold $\epsilon^* = 0.20$. The 1.5B fine-tuned agent crosses ϵ^* on the narrative axis.

(a) Median $|\rho|$ reduction from wall-clock-supported SFT

(b) T3.1 axis score — 1.5B crosses ϵ^* , 7B partial
