

Reverse-Scaling Theorem — four independent confirmations

Under CIT, $\mathbb{E}[|\rho| \mid K]$ is monotone non-decreasing in reasoning-token expansion K . Bars darken as K grows. Dashed green rule: $\epsilon^* = 0.20$.

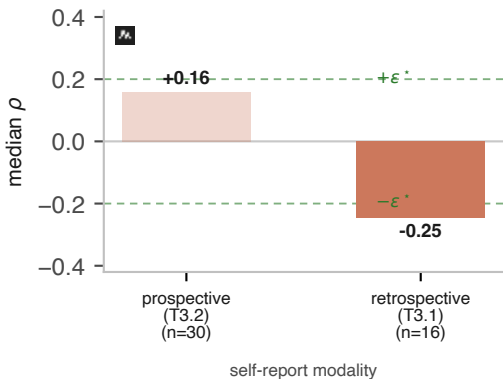

(a) Intra-model · o4-mini effort

(b) Cross-model · Sonnet ± thinking

(c) Within-model · prospective vs. retrospective

(d) Cross-vendor · GLM-5.2 ± injection
